MEMORANDEM FOR: Chief, Military Division, CCI TRACUBH: Chief, Requirements Branch, Reconnaissance Group, CCS AT. CIOR: FRO: Chief, CIA/PID (NPIC) SUBJECT: Search for Surface-Search Radar at Various Areas in Cuba REFERENCE: (a) Requirement C-CI-3-00,563 (b) CIA/PID Project C 1280-63 1. This memorandum is in response to your requirement dated 11 September 196 requesting a search in five areas in Cuba for a surface search radar of the Low Sieve or similar type, and associated communication facilities. 2. The following areas were searched with negative results: a. Punta de Meisi (20-15M 74-05M) b. Giberta Bay area (21-07M 76-05M) c. Punta Casinaba (20-15M 74-05M) d. Cabo San Antonio (21-52M 54-57M) e. Caleta Grande (21-22M 56-57M) The above missions are the latest and bost coverage of the search areas. The chiracteristics of surface-search redar requires placement near the shoreline for maximum effectiveness, as is the radar of the Vardero Peninsula. The shoreline near the above areas was searched and no towers or construction activity was noted. 3. The photo analyst on this project is	1	MEMORANDIM FOR
